Week 2 Quiz

latest submission grade 100%

	How do you use Image Augmentation in TensorFLow	1 / 1 point
	○ With the tf.augment API	
	With the keras.augment API	
	Using parameters to the ImageDataGenerator	
	O You have to write a plugin to extend tf.layers	
	✓ Correct	
<u>.</u>	If my training data only has people facing left, but I want to classify people facing right, how would I avoid overfitting?	1/1 point
	Use the 'flip' parameter and set 'horizontal'	
	Use the 'horizontal_flip' parameter	
	Use the 'flip' parameter	
	Use the 'flip_vertical' parameter around the Y axis	
	✓ Correct	
١.	When training with augmentation, you noticed that the training is a little slower. Why?	1 / 1 point
	Because the training is making more mistakes	
	Because the image processing takes cycles	
	Because there is more data to train on	
	Because the augmented data is bigger	
	✓ Correct	
١.	What does the fill_mode parameter do?	1/1 point
	○ There is no fill_mode parameter	
	It creates random noise in the image	
	It attempts to recreate lost information after a transformation like a shear	
	It masks the background of an image	
	✓ Correct	

	It gets overwritten, so be sure to make a backup	
	A copy is made and the augmentation is done on the copy	
	Nothing, all augmentation is done in-memory	
	O It gets deleted	
	✓ Correct	
6.	How does Image Augmentation help solve overfitting?	1 / 1 point
	O It slows down the training process	
	It manipulates the training set to generate more scenarios for features in the images	
	O It manipulates the validation set to generate more scenarios for features in the images	
	O It automatically fits features to images by finding them through image processing techniques	
	✓ Correct	
7.	When using Image Augmentation my training gets	1/1 point
	Slower	
	O Faster	
	Stays the Same	
	Much Faster	
	✓ Correct	
8.	Using Image Augmentation effectively simulates having a larger data set for training.	1 / 1 point
	○ False	
	True	
	✓ Correct
